DETAILED ACTION

Claims 43-54 remain pending

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

Response to Arguments

The Applicants arguments filed on July 12, 2005 have been fully considered. The amended claims are rejected in reconsideration of Kara, (WO 97/14117). See following rejection.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 43 and 49 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kara, (WO 97/14117) in view of Berson (US Patent No 5,768,384)

As per claim 43, and 49,
Kara ('117) discloses a method for shipping/mailling articles comprising the steps of:
producing the shipping/mailling data for generating a shipper's label.(Figure 16b; also
page 34, lines 5-25)

referring to an electronic address book (Figures 17 [element 1708, existing daabase])
referring to a database of valid addresses for validation (Figures 17 and 18)

Kara ('117) does not explicitly disclose generating shipping/mailling data for one of the
articles at one of a plurality of client terminals which are linked to a host terminal, wherein
generating comprises information transfer between the client terminal and the host terminal.

Art Unit: 3621

Berson ('384) discloses generating shipping/ mailing data for one of the articles at one of a plurality of client terminals which are linked to a host terminal, (Abstract) wherein generating comprises information transfer between the client terminal and the host terminal. (Figure 3) It would be obvious to one having ordinary skill in the art at the time the invention was made to combine the Kara method with the Berson in order to reduce the cost of operation by utilizing a network that can be centrally managed.

Claim 49 is in parallel with claim 43 and is rejected for at least the same reasons.

Allowable Subject Matter

Claims 46-48, 50-53 are allowable over the prior art record.

Claims 44, 45, 50 and 51 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Examiners note: Examiner has cited particular columns and line numbers in the references as applied to the claims above for the convenience of the applicant. Although the specified citations are representative of the teachings of the art and are applied to the specific limitations within the individual claim, other passages and figures may apply as well. It is respectfully requested from the applicant in preparing responses, to fully consider the references in entirety as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior art or disclosed by the examiner.

A handwritten signature in black ink, consisting of several loops and a long horizontal stroke, is written over a faint, rectangular stamp. The stamp contains text that is mostly illegible due to fading and the signature's overlap, but the words "SUPERINTENDENT" and "PATENT" are visible.
